

## EPOXY SMEAR TILE CLEANER

### Characteristic product properties

- Colourless.
- Ready to use, can be diluted.
- Eco-friendly.
- Walls and floors.
- Indoor and outdoor use.

### Applications

For removing epoxy resin residue and rings (PROF/ELV 123 omnifill) when the grouting material has hardened.

### Suitable surfaces

- Ceramic tiles, glass mosaics and natural stone.

### Surface preparation

- Tape off or carefully protect areas not to be treated.

### Application instructions

- Always wear protective equipment for the eyes and skin. Wash hands thoroughly after working with this product. Find out beforehand whether the tiles can be treated with ETR Epoxy Smear Tile Cleaner.
- Depending on how bad the epoxy smears left behind are, dilute ETR Epoxy Tile Cleaner, with clean tap water, preferably hot. If necessary, apply undiluted for tough epoxy smears.
- Leave to work in for approx. 10 - 30 minutes. Spread the ETR Epoxy Smear Tile Cleaner evenly on the surface. White nylon pad using a circular movement and slight downward pressure, or use a buffing machine so that the epoxy smear comes away from the surface. Always rinse well with clean tap water, preferably hot, or vacuum up and residual water using a liquid vacuum. Do not allow the residual water to evaporate and dry the surface well. If necessary, the treatment can be repeated.
- Do not apply in frosty conditions. This applies both for the surface and ambient temperature.

### Equipment to be used

- Sponge, brush, mop.
- Dry cloth.

### Consumption

10 - 20 m<sup>2</sup> per litre. Due to the wide variety of possible surface types and the degree of soiling, actual consumption of the product is variable.

### Equipment clean-up

After use, rinse with clean tap water.

### Product composition

ETR Epoxy Smear Tile Cleaner is a factory-made cleaner and degreaser with biodegradable surface-active substances, as stated in Directive (EC) n° 648/2004 in relation to detergents.

### Technical properties

- |                    |                                    |
|--------------------|------------------------------------|
| ■ Delivered as     | : liquid, solvent-free             |
| ■ VOC              | : 9.00% volatile organic compounds |
| ■ Colour           | : none, clear                      |
| ■ Consistency      | : watery                           |
| ■ pH               | : 11.4                             |
| ■ Water solubility | : not soluble                      |
| ■ Odour            | : characteristic                   |

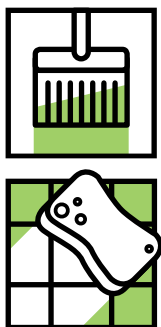

### Method of packaging

- Delivered in recyclable plastic bottles with a content of 1 litre.

### Storage and shelf life

- Transport and store away from frost. Protect against sunlight. Do not expose to temperatures in excess of 50° C.
- Shelf life in original sealed packaging: 24 months.

**Health/safety**
